

FIRE PROTECTION

GALAXY

Company Profile

GALAXY-Extends Business on a Global Perspective.

GALAXY company offers a wide range of products and systems in the field of valves, piping, and seismic isolation for applications ranging from equipment for office buildings, fire fighting, heating, water works, sewerage, marine, industrial to top fluid control. Our aim is meaningful contribution to society by providing comfort and safety through our products, technical skills and services!

GALAXY-Professional Manufacturer of Industrial Valves

GALAXY have variety products to meet customer demand of different valve. Designing, manufacture and sale of one-stop service is the company's core strengths.

GALAXY products cover the following industry area:

Water supply system, water treatment, food, chemical, cement, air-conditioning systems, industry engineering, nuclear power, papermaking, Petrochemical Industry, pharmaceuticals, Powder Industry, steel industry, sugar refining, textiles and so on. GALAXY anti-pollution environmental protection industry is one of the major business. GALAXY provides various valve for wastewater processing and exhaust gas processing.

GALAXY have wide variety of industrial valves, including following main products:

- ▶ Fire Protection Valve
- ▶ Balancing Valve
- ▶ Butterfly Valve
- ▶ Gate Valve, Globe Valve, Check Valve, Ball Valve
- ▶ Strainer
- ▶ Flexible Rubber Joint
- ▶ Flexible Stainless Steel Hose, Expansion Joint

Other Valves and fittings are also available from GALAXY

All products will be designed, manufactured and assembly by GALAXY.

CERTIFICATE

CERTIFICATE OF COMPLIANCE

Certificate Number 20130703-EX16375
Report Reference EX16375-20130701
Issue Date 2013-JULY-03

Issued to: GALA RS INC
 SUITE 201
 11200 WESTHEIMER RD
 HOUSTON, TX, 77042, US

This is to certify that representative samples of
 STRAINERS, PIPELINE
 Strainers, basket type - 70FF-300, 70FG-300, 70GG-300, 70FF-250, 70FG-250, 70GG-250, 70FF-200, 70FG-200, 70GG-200.

Have been investigated by UL in accordance with the Standard(s) indicated on this Certificate.

Standard(s) for Safety: UL Subject 321 - Outline of Investigation for Pipeline Strainers

Additional Information: See the UL Online Certifications Directory at www.ul.com/database for additional information

Only those products bearing the UL Listing Mark should be considered as being covered by UL's Listing and Follow-Up Service.
 The UL Listing Mark generally includes the following elements: the symbol UL in a circle with the word LISTED, a control number (may be alphanumeric) assigned by UL, and the product category name (product identifier) as indicated in the appropriate UL Directory.
 Look for the UL Listing Mark on the product.

CERTIFICATE OF COMPLIANCE

Certificate Number 20190506-EX15959
Report Reference EX15959-20121023
Issue Date 2019-MAY-06

Issued to: TIANJIN GALAXY VALVE CO LTD
 15 TIANHUA RD
 BALITAI INDUSTRIAL AREA
 JINNAN DISTRICT
 TIANJIN
 300350 CHINA

This certificate confirms that representative samples of
 CHECK VALVES
 See addendum page for models.

Have been investigated by UL in accordance with the Standard(s) indicated on this Certificate.

Standard(s) for Safety: UL 312 - Check Valves for Fire-Protection Service
 UL CQIRD C312-47 - Check Valves for Fire-Protection Service

Additional Information: See the UL Online Certifications Directory at <https://in.ulrospector.com> for additional information.

This Certificate of Compliance does not provide authorization to apply the UL Mark. Only the UL Follow-Up Services Procedure provides authorization to apply the UL Mark.
 Only those products bearing the UL Mark should be considered as being UL Certified and covered under UL's Follow-Up Services.
 Look for the UL Certification Mark on the product.

Certificate of Compliance

This certificate is issued for the following:
AIR RELEASE VALVES
Model 9712
Sizes 1/2, 3/4 and 1 inch NPS

Prepared for:
 Gala RS Inc.
 11200 Westheimer, Suite 201
 Houston, TX 77042
 USA

FM Approvals Class: 1344 Air Release Valves 1/2 Inch through 1 Inch, dated January 2010
 Approval Identification: PR452028 Approval Granted: November 5, 2018

To verify the availability of the Approved product, please refer to www.approvalguide.com

Said Approval is subject to satisfactory field performance, continuing Surveillance Audits, and strict conformity to the constructions as shown in the Approval Guide, an online resource of FM Approvals.

Swing Check Valve

Resilient Seated Grooved Ends Riser (Shotgun)

Fig.50GGP-365
50GGP-300
50GGP-250
50GGP-200

Valve Standard

Fusion bonded coating comply with AWWA C550

Features

Can be installed horizontally or vertically (with upward flow)
Convenient to install and maintain
Low pressure drop

Working pressure

200PSI / 250PSI / 300PSI / 365PSI

Working Temperature

0°C to 80°C

Connection Ends

AWWA C 606
VDS2100

Water Flow Detector With Retard

Fig.1042-V

DESCRIPTION

The 1042-V is a vane type water flow detector for use on fire protection and wet sprinkler system. It is suitable for use with Schedule 10 through 40 steel pipe of 2" to 8", and can be installed in vertical or horizontal pipe. The detectors shall have a sensitivity in the range of 4 to 10 gallons per minute, and a service pressure up to 450psi. 1042-V will respond to waterflow in the specified direction after preset time delay that is adjustable on site.

FEATURES AND SPECIFICATIONS

- Two conduit opening of 1/2". One open; one knock-out type
- Sensitivity Range : 4 ... 10 usgpm
- Contact Rating : Two sets of SPDT (Form C) 10Amps (125 / 250 VAC) / 2Amps (24 VDC)
- Enclosure Rating : NEMA 4- suitable for indoor / outdoor
- Compatible Pipe: 2" to 8"
- Special tamper screws to prevent disassembly
- Maximum Surge : 5.5m/s
- Time delay adjustment via rotating dial
- Two sets Micro-switch, 100% synchronization
- Working pressure : Max. 31bar / 450psi
- Working temperature : 4.5°C ... 49°C

Nominal Dia 5.15" (130.8mm) for 2" ... 2½" (DN50 ... DN65)
 Nominal Dia 2.05" (52.1mm) for 3" ... 8" (DN80 ... DN200)

ORDERING MODEL AND SIZE

MODEL	PIPE SIZE	HOLE SIZE
1042-V-050	50mm (2")	31.8mm (1¼")
1042-V-065	65mm (2.5")	31.8mm (1¼")
1042-V-080	80mm (3")	50.8mm (2")
1042-V-100	100mm (4")	50.8mm (2")
1042-V-150	150mm (6")	50.8mm (2")
1042-V-200	200mm (8")	50.8mm (2")

Note: Subject to change without prior notice due to products optimization.

Water Flow Detector With Retard

Fig.1042-V

INSTALLATION GUIDE

The 1042-V water flow detector may be mounted on a horizontal or vertical pipe. On horizontal pipe, it should be installed on the top side of the pipe where they will be accessible. The detector should not be installed within 6" (150mm) of a fitting which changes the direction of the waterflow or within 24" (600mm) of a valve or drain.

Drain the system and drill a hole on the pipe. The 2" (50mm) and 2½" (65mm) detectors require a hole with a diameter of 1¼" +/- 0.08" (31.8mm +/- 2mm). All other sizes require a hole with a diameter of 2" +/- 0.08" (50.8mm +/- 2mm).

Clean the inside pipe of all growth or other material for a distance equal to the pipe diameter on either side of the hole.

Roll the vane so that it may be inserted into the hole; do not bend or crease it. Insert the vane with the arrow on the saddle points in the direction of the waterflow.

Do not leave cover off for an extended period of time.

Retard Adjustment : The delay can be adjusted by rotating the retard adjustment knob from 0~Max position (0~90 secs). Factory setting is position 2 (Delay time is approximate 30 seconds). The time delay should be set at the minimum required to prevent false alarms.

CAUTION	
Hole must be drilled perpendicular to the pipe and vertically centered.	
CORRECT	INCORRECT
	

ELECTRICAL CONNECTIONS AND TIME DELAY ADJUSTMENT

The 1042-V water flow detector have two switches, one can be used to operate a central station, proprietary or remote signaling unit, while the other contact is used to operate a local device or visual annunciator.

Note : Retard Structure can be set from "0" to "MAX" position, delay time can be set from 0~90 secs.

Note: Subject to change without prior notice due to products optimization.

Water Flow Detector With Retard

Fig.1042-T

FEATURES

- FM Approved.
- Rating Working Pressure: FM-Max 450PSI (3.1MPa)
- Flow Sensitivity Range for Signal: 4-10GPM (15.0-37.5L/min)
- Maximum Surge: 18FPS (5.5m/s)
- Contact Ratings: Two sets of SPDT (Form C)
 - 10.1Amps at 125/250 VAC
 - 2.0Amps at 24 VDC
- Operating Temperature Range: 40° F to 120° F (4.5°C to 49°C)
- Enclosure Rating: NEMA 4- suitable for indoor/outdoor use
- Conduit Entrances: Two opening for 1/2" conduit
One open, one knock-out type
- Compatible Pipe: Fits 1", 1-1/4", 1-1/2" and 2" ferrous and brass threaded tees
- COVER Material: Aluminum Die-casting. Alternative Material Plastic

ENGINEERING SPECIFICATIONS

The 1042-T water flow detector shall be installed in a tee that has a 1 inch NPT side outlet include 1in.、 1-1/4 in.、 1-1/2 in. and 2in. as designated on the drawing and/or as specified herein. Water flow detectors shall mount on any clear pipe span of the appropriate nominal size, either a horizontal or vertical pipe. The detector shall respond to water flow in the specified direction after a preset time delay that is field adjustable. The retard structure shall be a sealed mechanical pneumatic unit with visual time delay adjustment.

INSTALLATION

The 1042-T water flow detector may be mounted on horizontal or vertical pipe. On horizontal pipe they should be installed on the top side of the pipe where they will be accessible. The devices should not be installed within 6"(150mm) of a fitting which changes the direction of the water flow within 24"(600mm) of a valve or drain. Select the proper paddle for the pipe size and type of TEE used according to below table changing paddle refer to Fig.2. The unit has 1" NPT male thread for installation into a TEE. Refer to Fig.1 for proper TEE size and installation. Use no more than three wraps of Teflon tape.

Screw the device into the TEE fitting as shown in Fig.1. Care must be taken to properly orient the device for the direction of water flow. The vane must not rub the inside of the TEE or bind in any way. The stem should move freely when operated by hand.

Note: Subject to change without prior notice due to products optimization.

Water Flow Detector With Retard

Fig.1042-T

NOTE: Do not leave cover off for an extended period of time. Retard Adjustment: The delay can be adjusted by rotating the retard adjustment knob from 0~Max position (0~90secs). Factory setting is position 2 (Delay time is approximate 30 seconds). The time delay should be set at the minimum required to prevent false alarms.

Field Typical Electrical Connections:

Notes:

The 1042-T water flow detector has two switches, one can be used to operate a central station, proprietary or remote signaling unit, while the other contact is used to operate a local device or visual annunciator.

This additional pin hole would allow the wrench (coming with the device) to insert into it and temporarily stop the device from functioning causing false alarm during the maintenance. When the wrench is in there, it also prevents the red device cover to be removed.

Brass Valve

Fire Department Connections

Fig.1650

Features

- The brass seat is integrated with brass body
- 2.5" swivels are pin lug design for easy operation
- Compatible with local fire service requirements
- Breakable plastic plug to prevent debris from being accidentally introduced into the water way

Description

GALA FM Approved and UL listed Fire Department Connections are designed and manufactured in accordance with UL 405 - Standard for Fire Department Connections. We have two models, one is a straight and a 90° type which casted from solid brass alloy to extend its service life.

Working Pressure

365psi

Installation

The Fire Department Connection is provided with standard taper pipe threads which conforms to ANSI B2.1 and pin lug hose thread swivels for coupling hoses. Prior to installation, Apply pipe joint compound or PTFE tape on male threads, then, tighten it one full turn after tightening with hand, and make sure Connections are aligned accordance to the requirement.

Optional Accessories

Wall Plates

The wall plates are constructed of corrosion resistant aluminium alloy with marking "AUTO SPKR" and "FIRE DEPT CONNECTION"

Caps

The breakaway caps are supplied in heavy duty plastic or cast aluminium alloy for the protection of 2½ inlets.
